Pre-Venta en Ruta: Improved use of routes for gas trucks.

Whatsapp Chatbot. Retool Config. Documentation.

Improving operators’ route efficiency by leveraging customer location data and proximity to their next purchase

We determined the optimal solution involves implementing a WhatsApp chatbot, supported by location-based and order quantity rules, plus a web admin panel for parameter adjustments to make it future-proof.

My role:
Conversational designer.

...also I was in charge of the design system and tokens.

Xosecristo

Our Process:

1. User reserach.

2. Competitive analysis.

3. Conversation design & iterate.

Xosecristo

Deliverables:

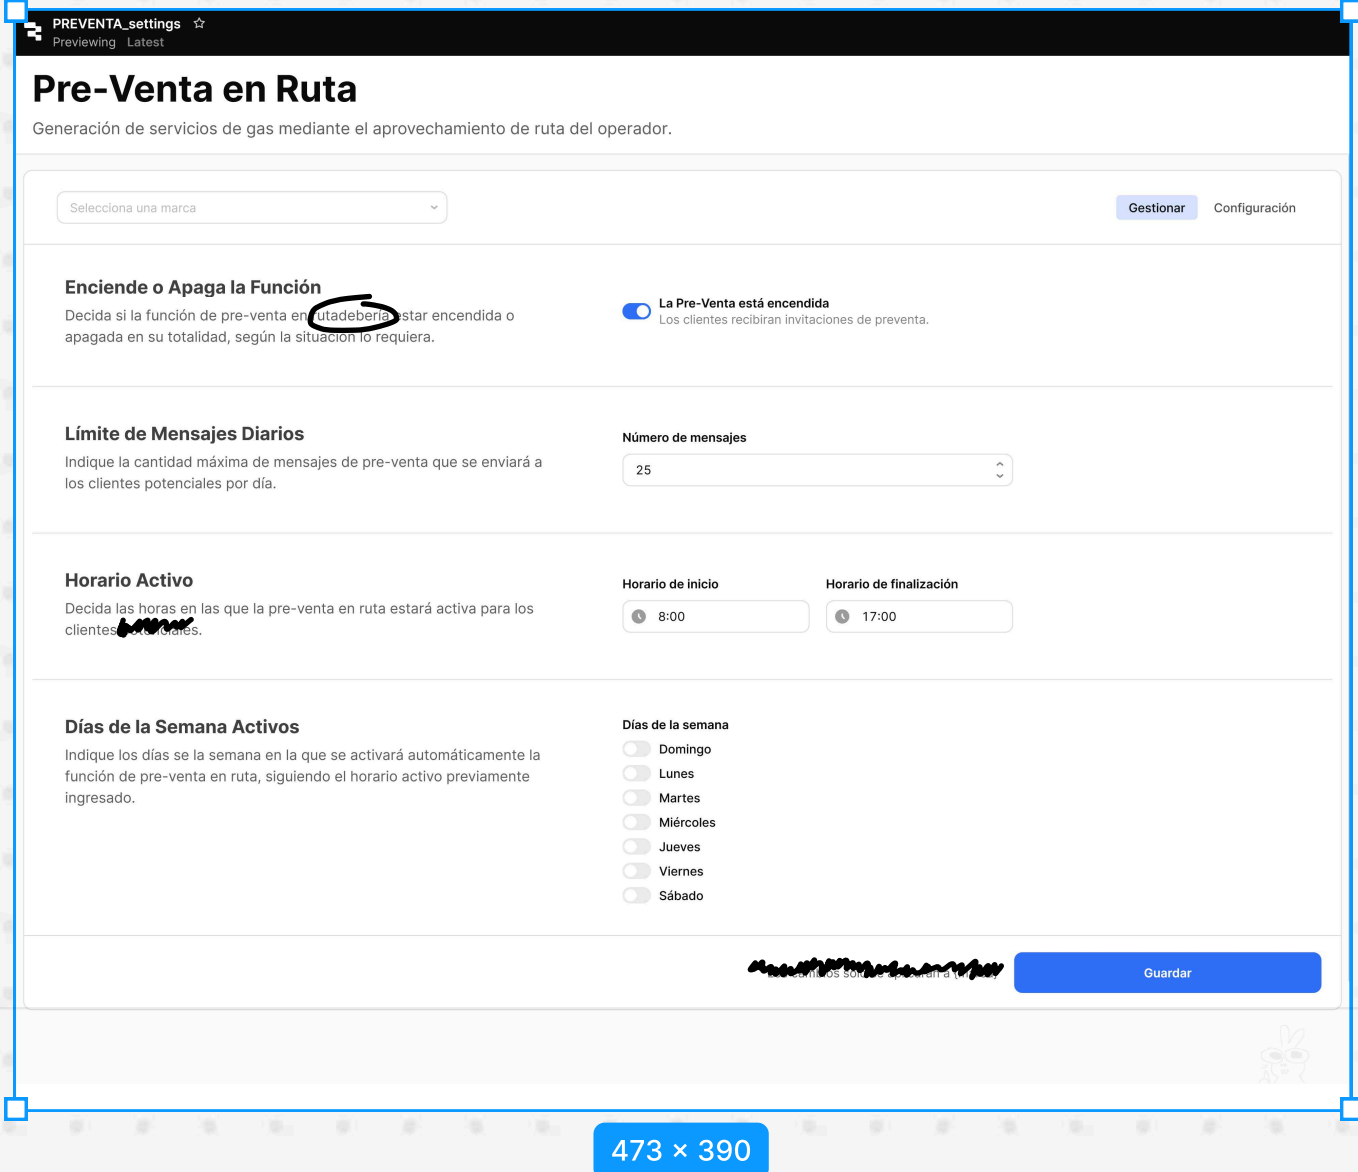

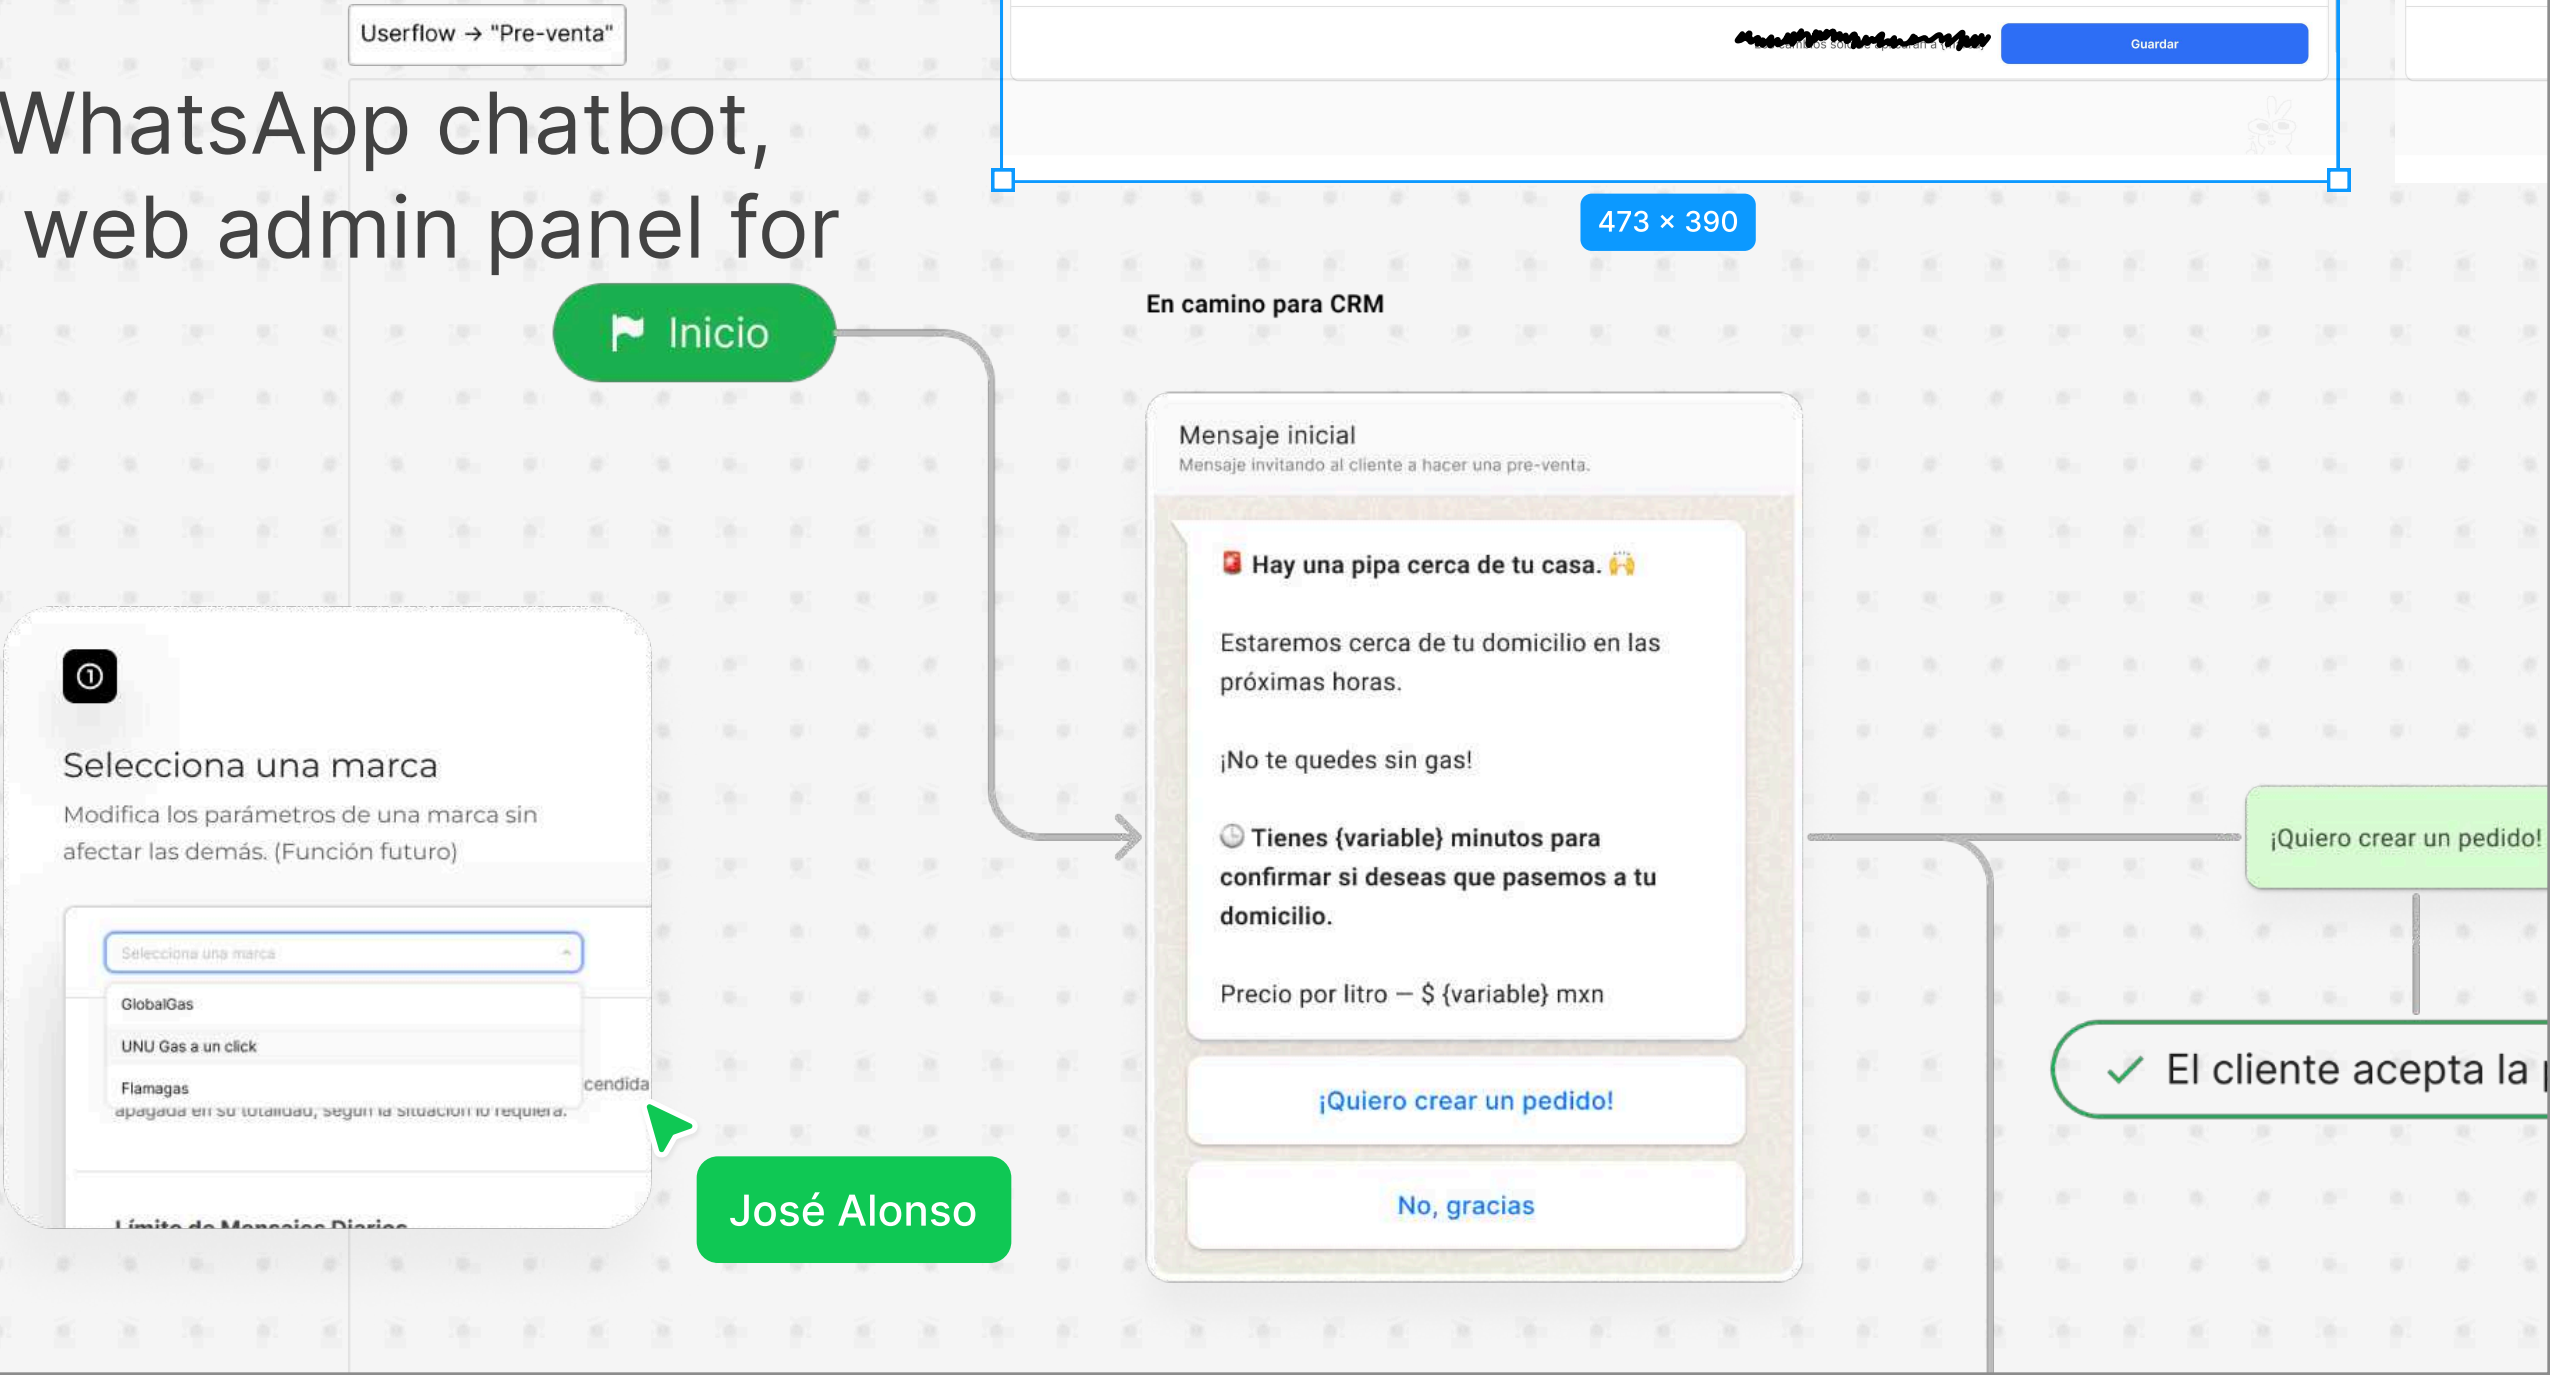

• Chatbot flowcharts.

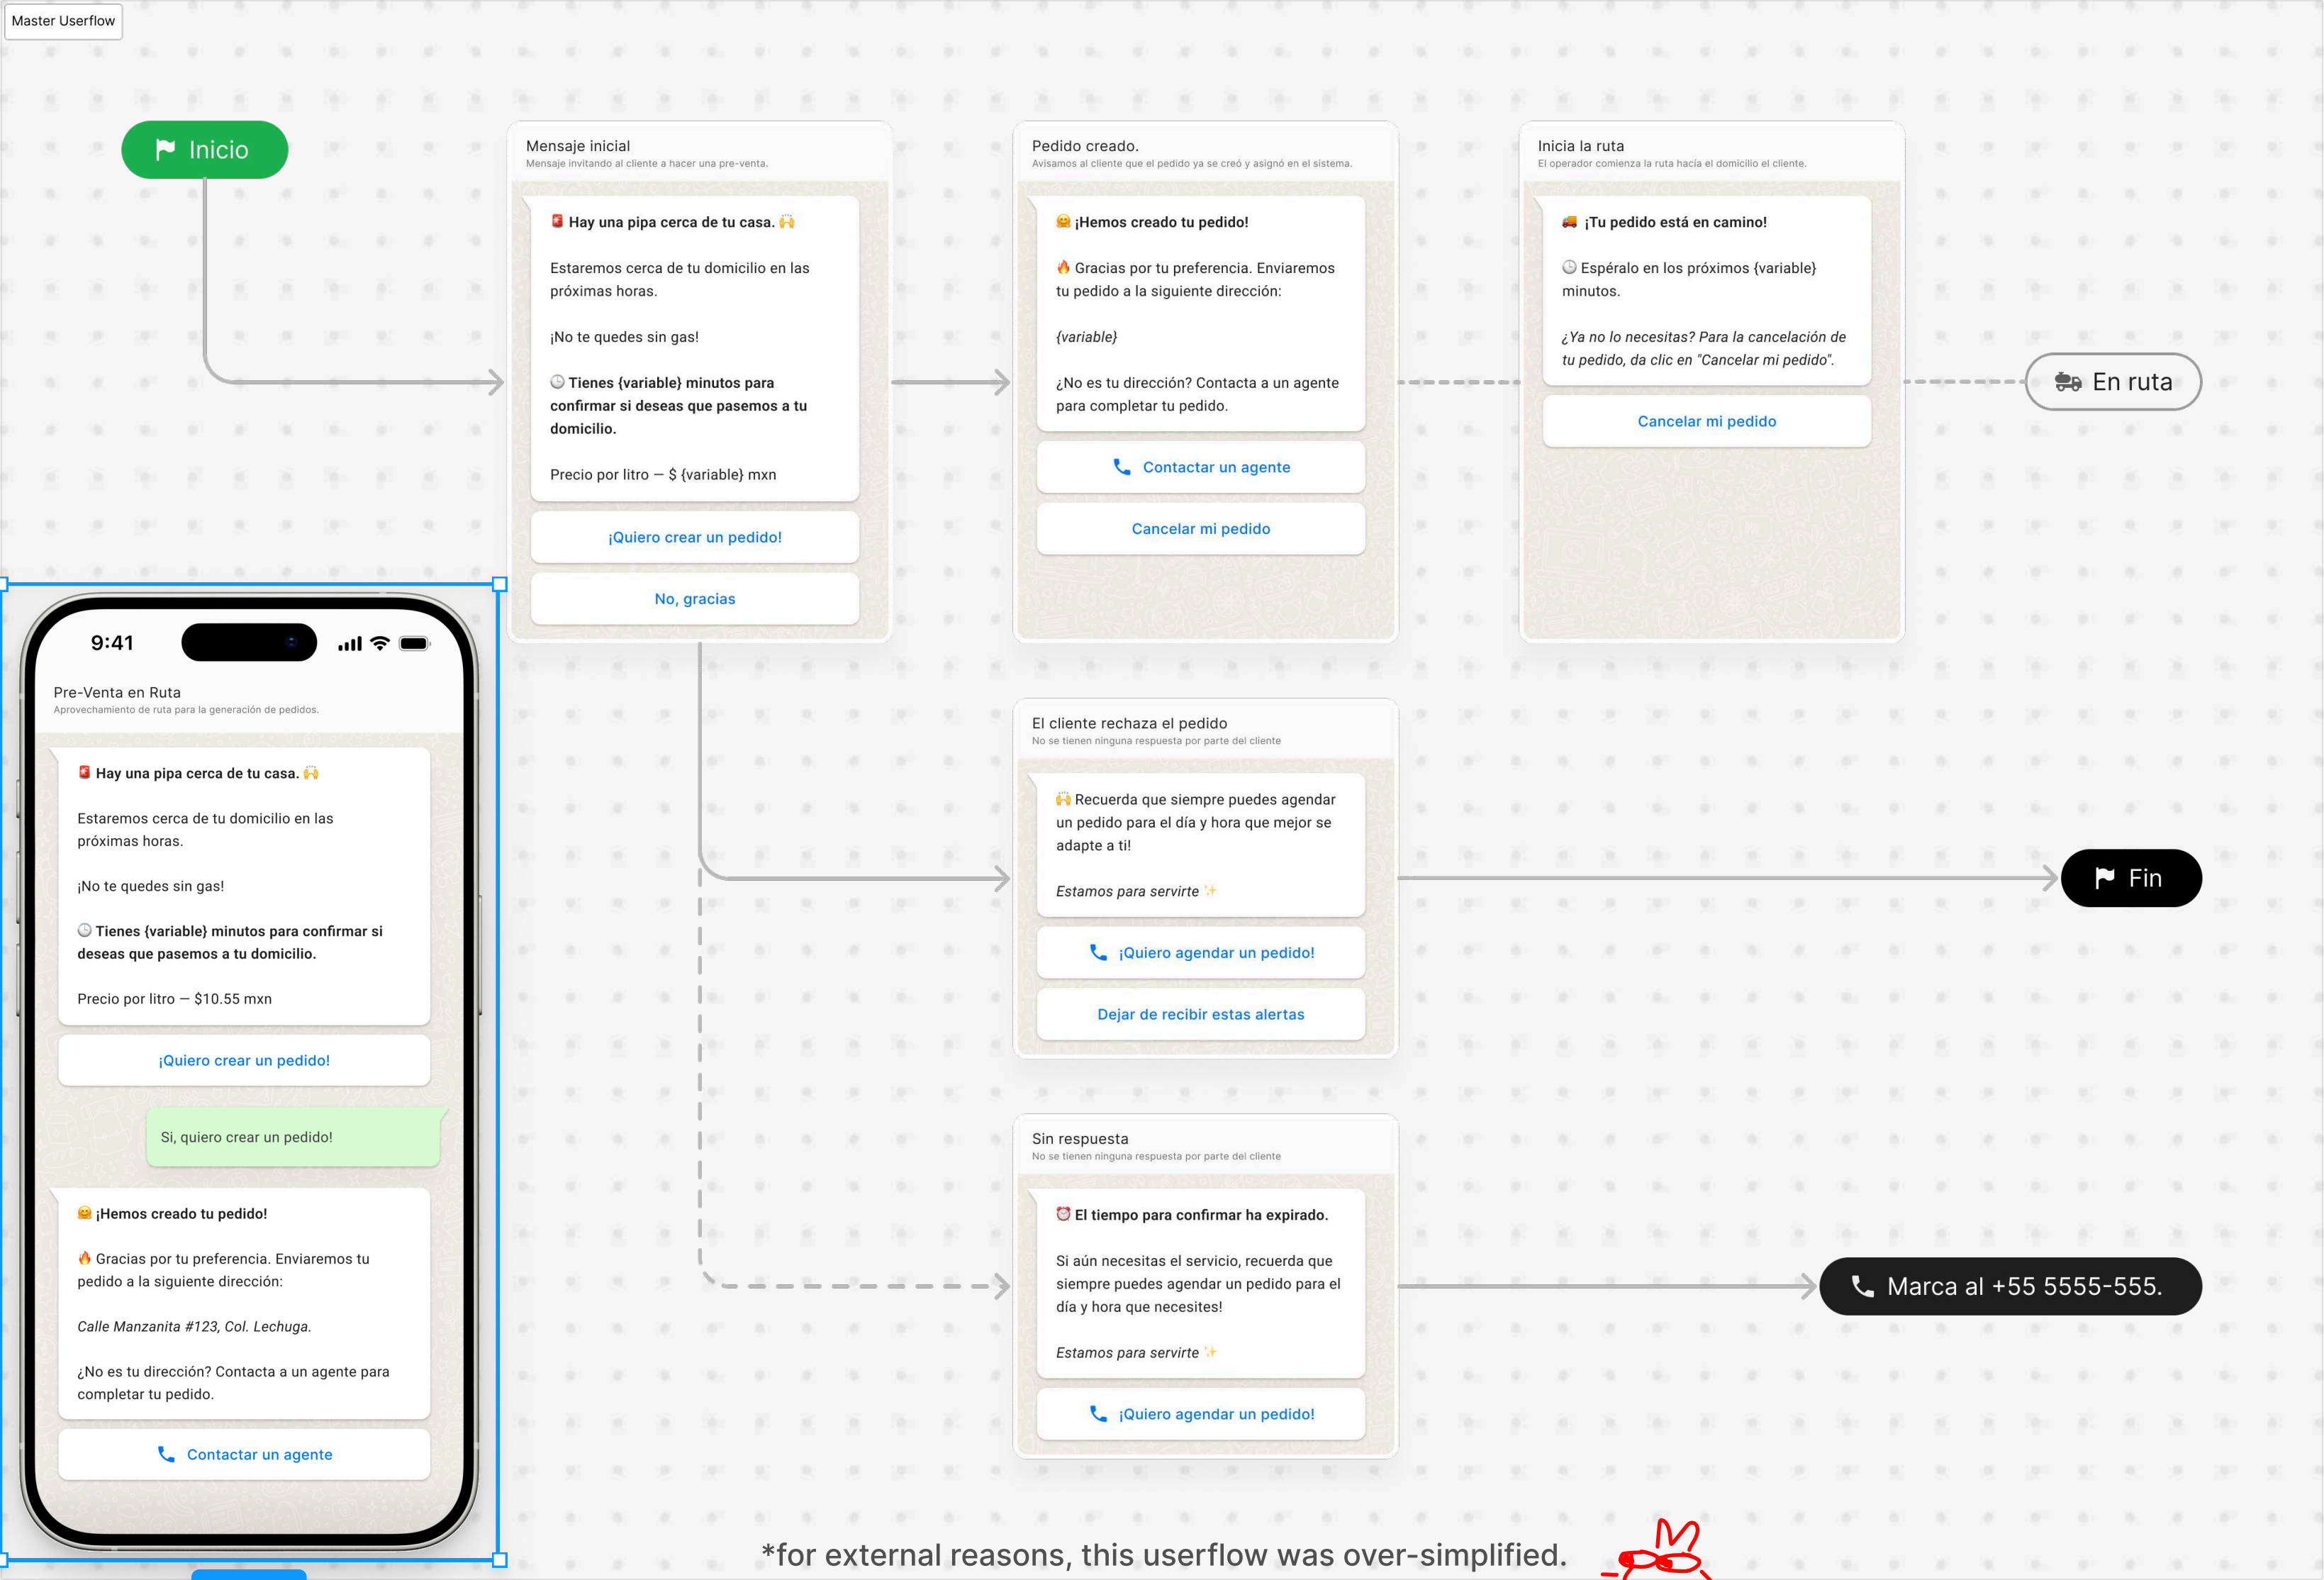

• Retool admin.

• User research & documentation.

• Quickstart guide.

Salestable: How did we help sales teams to become 10x using AI

New features. Design System. Improved organization for Figma files & documentation.

The main goal was to evolve the platform in line with market needs, adhering to the highest quality standards and emerging methodologies while maintaining the product’s cohesive integrity.

Following the client’s roadmap, we implemented steady UX enhancements and AI-powered features.

My role:
Sole UX/UI designer.

...we used an external design system at first. But over time we decide to make our own with auto-layout.

Xosecristo

Our Process:

1. Stakeholder interviews.

2. Reserach.

3. Design & design system.

Xosecristo

Deliverables:

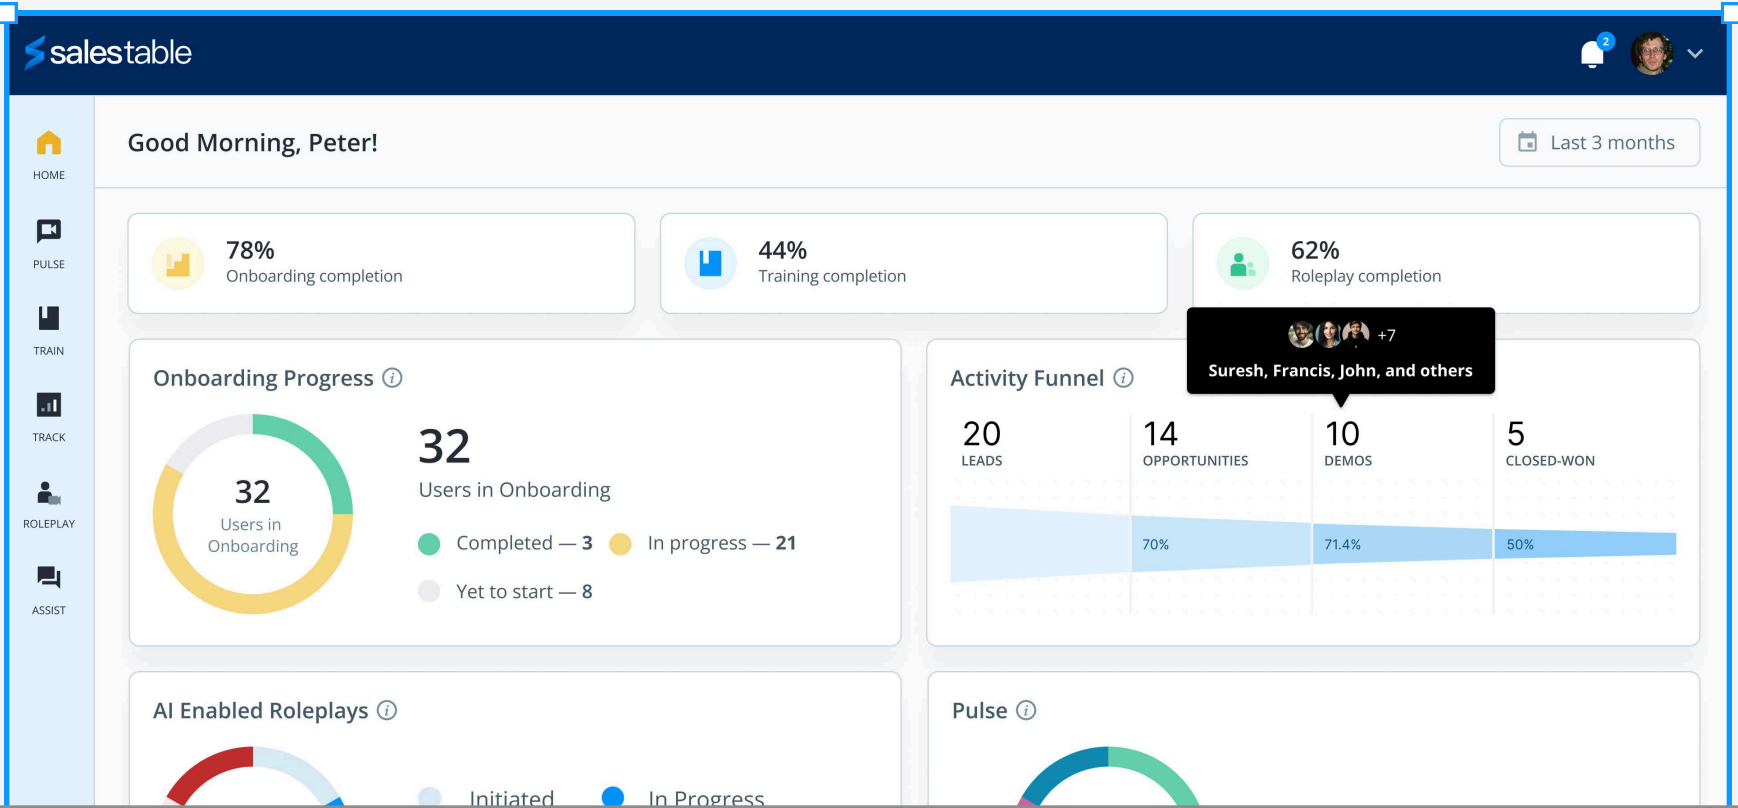

Figma organized by user stories.

Design System.

Pricing webpage.

Marketing assets.
